

Game Scheduler

Create an app which accepts schedule of a **tournament** and generates various reports.

Consider following points

1. Tournament consists many Games
2. A Player plays one or more Games
3. A Game is played on a particular Day
4. On one Day Many games can be played

App should be able to generate following reports, based on above information-

1. Given the Player name, find all days where her games are schedule – Player-wise Report
2. Given the Game name, find all Players and Days where this Game is played players and days on which it is scheduled – Game-Wise Report
3. Given the Day name, find all the Games which are scheduled on this Day as well as Players who play the Games scheduled on this Day.
 - Games which are scheduled on this Day
 - Players who play the Games scheduled on this Day.
